

Quest for Facilities A4 – Customer Delivery and Insights

Guidance Notes

Focus: The module focuses on understanding and improving the customer journey by collecting and using real-time feedback, analysing NPS and retention data, and delivering personalised and inclusive services that enhance satisfaction and engagement.

Key elements:

- Customer journey and experience
- Real-time feedback collection and use
- Net Promoter Score (NPS) and retention data
- Personalisation and inclusive service delivery.

Best Practice Examples

- **Embedding a Customer-Centred Culture:** Delivering excellent customer experiences is fully embedded in the facility's culture. Staff understand the importance of every touchpoint and are trained and empowered to deliver consistently high-quality service. Customer satisfaction, retention, and engagement are core priorities, not optional tasks.
- **Structured Customer Journey Planning:** The customer journey is clearly mapped and planned, covering every stage from initial contact to ongoing participation. Touchpoints are designed to be intuitive, inclusive, and consistently high standard. Plans are reviewed regularly to adapt to changing customer needs and expectations.
- **Comprehensive Staff Training and Development:** Staff receive structured training on customer service, including face-to-face workshops, role play, scenario-based exercises, and induction sessions. Ongoing development is supported by coaching, refresher training, audits, and mystery visits. Staff understand their role in delivering an excellent customer journey and are empowered to take ownership of service quality.
- **Proactive Measurement and Review:** Customer service delivery is systematically measured and reviewed using multiple methods such as surveys, real-time feedback, NPS, retention data, audits, and mystery visits. Findings are analysed to identify trends, inform improvements, and ensure services remain responsive to customer needs.
- **Using Feedback and Insight to Drive Improvement:** Feedback and insights from customers are actively collected, analysed, and acted upon. Improvements are evidence-based and measurable, resulting in better experiences, higher satisfaction, and increased retention. Staff are engaged in interpreting insights and implementing service enhancements.

Quest for Facilities A4 – Customer Delivery and Insights

Guidance Notes

Best Practice Examples (continued...)

- **Inclusive and Personalised Service Delivery:** Services are accessible, equitable, and responsive to all users, including underrepresented or inactive groups. Personalisation and inclusivity are embedded in communication, programming, and service delivery, ensuring every customer feels valued and supported.
- **Effective Communication and Promotion:** Services, customer journeys, and improvements are clearly communicated across multiple channels, including on-site displays, website, social media, and email. Communication strategies target both new and existing customers to drive engagement, retention, and growth.
- **Measurable Impact and Recognition:** Improvements to customer delivery result in tangible, organisation-wide benefits: increased satisfaction, stronger retention, higher NPS, and more inclusive service experiences. Achievements are recognised and celebrated, reinforcing a culture of continuous improvement and staff engagement.
- **Integration with Industry Best Practice:** Practices align with recognised customer service and experience standards, sector guidance, and evidence-based insights. Facilities benchmark performance against national standards, adopt innovative approaches, and continuously refine delivery to meet evolving customer expectations.
- **Staff Engagement and Ownership:** Staff at all levels are fully involved in customer delivery planning, measurement, and improvement. Ownership of processes ensures sustained high-quality service, proactive problem-solving, and a culture of accountability and pride in service excellence.
